Aim: The aim of the EBCCSP 2020 conference is to bring together researchers and practitioners from the industry and academia and provide them with a platform to report on recent advances and developments in the event-based systems and architectures applied in a wide spectrum of engineering disciplines including control, communication and signal processing.

Solicited Papers: Research papers reporting on new developments in technological sciences. Industry and development papers reporting on actual developments of technology, products, systems and solutions. Tutorial and survey papers.

Work-in-progress papers: In addition, EBCCSP 2017 solicits special session proposals to stimulate in-depth discussions in special areas relevant to the conference theme. Please consult the conference web page for more details.

Topics include, but are not limited to:

- Event-based control & systems
- Event-based communication, computing & systems
- Event-based signal processing & systems
- Event-based electronics & microelectronic systems
- Discrete-Event Systems

Submission of Papers: Manuscripts must be electronically submitted in PDF format, according to the instructions given on the conference web site. Contributions must contain original unpublished work.

Two types of submissions are solicited:

- Long Papers – limited to 8 double-column pages.
- Work-in-Progress Papers - limited to 4 double-column pages.

Each accepted paper must be presented at the conference by one of the authors.
